Figure 2

Illustration of the Direct and Indirect Associations Between Study Condition, Perceived Job Relevance, and Perceived Job Attractiveness (n = 122).

Study Condition
0 = No prime
1 = Prime

Direct: $b = -.08$, $se = .14$, $p = .59$
Indirect: $b = .36$, $se = .15$, 95% CI [.08, .67]

Perceived Job Relevance

Perceived Job Attractiveness

$b = .71$, $se = .27$, $p = .009$

$b = .50$, $se = .05$, $p < .001$
